(a) to nearest test sequence
generated β=1 → test
generated β=1.05 → test
test → other test
density
normalised Hamming distance
(b) to nearest training sequence
generated β=1 → train
generated β=1.05 → train
test → train
normalised Hamming distance
(c) all pairs within a set
generated β=1, within set
generated β=1.05, within set
test, within set
generated vs test
normalised Hamming distance
