
Energy along the chains
median $E(x_t)$
sweeps + 1
Distance from the start
$d_H(x_t, x_0)/L$
mean test–test distance
sweeps + 1
Single chains (β=1, first 300 sweeps)
$E(x_t)$
sweeps
Energy autocorrelation at stationarity
ρ_E(lag)
β=1: τ_{int} = 6.5 sweeps
β=1.05: τ_{int} = 5.6 sweeps
lag (sweeps)
generated β=1
generated β=1.05
start: training sequence
start: uniform random
natural test (mean)
